

Resonance

EXPERIENCE CONVERGENCE

WHAT IS RESONANCE?

Resonance is about the end-game and the call to finish well. Leaders who have reached the end often wonder (1) what difference their lives made and (2) what (if any) is their role when “position” and “influence” have shifted to other leaders.

Resonance is a personal development discovery process designed to help navigate questions related to finishing well, especially one’s legacy and influence in the end-game. It draws upon past shaping and life experiences to discern an individual’s ultimate Kingdom contribution. It seeks to address three questions: *What do you have to offer? Who are you suppose to offer it to? What will live beyond your days?*
